

AMENDMENTS TO THE SPECIFICATION

Please delete the previous title of the application and substitute the following new title:

-- METHODS, COMPUTER SYSTEMS, AND COMPUTER READABLE MEDIA FOR GENERATING DISPLAYS OF SETS OF NETWORK ADDRESSES WITH STATUS INDICATORS --

Please delete the previous abstract of the disclosure and substitute the following new abstract:

-- Methods, computer systems, and computer readable media for generating displays of networking addresses with status indicators are provided. The display may provide a grid containing individually selectable grid spaces representing networking addresses of a set. The networking addresses of the set have at least one attribute and the value of the attribute is indicated in the display. The value of the attribute may be indicated by a color for the networking addresses of the set having the attribute. Furthermore, the networking addresses of a block may be represented by rectangles defining the blocks within the display. The display may provide additional features as well, such as the ability to zoom in and out and select areas within the displayed map through selection of the rectangles. --
